### **PRODUCT IDENTIFICATION**

Product Model: RKT2418M (specs listed for 2' x 4' model)

Product Description: LED ceiling troffer retrofit kit, w/magnetic LED strips and driver

### **PRODUCT SPECIFICATIONS**

Watts: 39.8

Voltage: 110-277v 60 Hz

Power Factor: >.90

Power Supplied: Quick-connect, remote driver

Dimensions: 42" x 1" PCB (2)

Mounting method: Magnetic, quick-connect

Lumens: 5,140 LED

Luminous Efficiency: 126 lm/w

CCT: 5000K

CRI (Ra): 82.8

Weight: .8 lbs.

Beam Angle: 140° x 2

*Absolutely the simplest, easiest, most efficient, most cost effective LED Troffer Retrofit kit in America. This Retrofit kit installs in 3 or 4 minutes, with only your bare hands. Just disconnect power from the ballast, connect power to the LED driver, and plug the driver into the LED strips. It's that simple! The LED strips and the driver are magnetic backed, so they literally attach themselves to the troffer body in seconds.*

*The entire body of the troffer becomes the heat sink for the strips, making them operate extremely cool, which dramatically extends their lifespan and efficiency. From efficiency to ease of install to incredible performance to low cost ... the RKTXXXXM series retrofit kits are head and shoulders above the competition in every way. Available in 2' x 4" or 2' x 2' variants. 4' and 8' strip light kits also available.*
